

Keystone's New 2010 Product Supplement.

Astoria, NY– More than 125 new products designed for use with the latest technologies for SMT or THM applications, are featured in this multi-colored, 16 pages supplement published by Keystone Electronics Corp., a major manufacturer of electronic interconnect and hardware.

Specially, the supplement explores an expanded selection of battery hardware; contacts, clips, holders and retainers for coin cell and button cell batteries; new, multi-use fuse holders and clips for mini and standard auto blade fuses; top quality, insulated terminals, pins and jacks with PTFE bushings and insulators; standard USB, micro USB, mini USB type A & B plugs and sockets for both SMT and THM mounting in USB 2.0 and 3.0 configurations.

Complete with engineering drawings, mounting details, product specifications and color photographs, the new supplement support Keystone's full line M55 catalog which covers their extensive line of interconnect components and hardware.
