

UL Recognition Due for Quick-Fit Female Terminals.

Astoria, NY – Keystone's popular series of female, quick-fit PCB terminals, which provide vertical, horizontal or bottom entry connections with male types are now undergoing UL Component Recognition processing and are due for release by June 2009.

These sturdy, Tin Nickel-Plated terminals are designed to maintain solid integrity under repeated, multiple mating cycles. Horizontal entry types accept 2.8mm, 5.2mm or 6.4mm male tab sizes. Vertical entry configurations accept 2.8mm, 4.8mm, 5.2mm or 6.4mm male tab sizes. The Universal entry receptacle [p/n 3557] accepts 2.8mm to 6.4mm male, quick fit counterparts with either vertical or horizontal entry as well as a bottom entry type [p/n 3577].

Mating male versions of these Quick-Fit PCB terminals have already been granted UL approvals, will be joined by the female series recently submitted.

Keystone Electronics Corp. is a major manufacturer of interconnect components and hardware and provides a full complement of stamping, machining and assembly services. An in-house application engineering group is available to assist customers needing product modifications or special designs.
