

New SMT "Auto Blade" Fuse Clips, hold firmly!

Astoria, NY... A wide selection of surface mount, automotive blade fuse clips engineered to secure fuses in place even after multiple insertions is now available from Keystone Electronics Corp.

Especially suited for high-density applications, these new, compact, low profile clips are available in vertical, horizontal and thru-board blade entry types. They accept standard style ATO and ATC Fuses; low profile Mini #891 or ATM-LP Fuses as well as Mini and ATM series of Mini Auto Fuses. Voltage rating is at 500VAC and 15-30 Amps. The new entries are made of Brass with Tin Nickel plate and are available in bulk or in tape and reel.

For vertical entry clips used with Mini, low profile or standard Auto Blade Fuses, ask for p/n 3586 or 3586TR (T&R). For horizontal clips used with Mini Auto Blade Fuses, ask for p/n 3569 or 3569TR (T&R). For low profile environment vertical entry clips using Mini Auto Fuses ask for p/n 3563 or 3563TR (T&R).

Keystone Electronics Corp. offers a comprehensive line of fuse clips and holders for a wide variety of fuse sizes and styles, interconnect hardware and components, as well as stamping, machining and assembly services.
