

Easily Installed, Molded Self-Adhesive Bumpers.

Astoria, NY... Crack-resistant, molded Polyethylene, self-adhesive bumpers equipped with high-strength adhesive backing to guard against vibration and slippage on equipment, chassis and panels are the latest electronic hardware from Keystone Electronics Corp.

Easily installed, these new "stick-on" bumpers firmly adhere to equipment surfaces while protecting internal components and preventing nicks, scratches and scuff marks. Available in black or clear rectangular (flat) or cylindrical (domed) shapes. Sizes from 6.4mm to 12.7mm diameters. Packaged on sheets.

For additional specifications and details on the firm's entire selection of Grommets, Bumpers and Bushing or a complete overview of Keystone's interconnect and electronic hardware family, contact us.
